✉ jnanaprasad.work@gmail.com ☎ +91 6361124272 🌐 Github 🌐 LinkedIn 📍 Mysuru, Karnataka

PROFILE

B.E. Computer Science (AI & ML) student with hands-on experience in backend development and data engineering. Experienced in building scalable distributed systems, data pipelines, and AI-powered applications through an industry internship and hands-on projects.

SKILLS

Programming languages

C, C++, Python

Frameworks

React.js, FastAPI, Node.js, Express.js

Databases

MongoDB, MySQL, PostgreSQL

Tools and Technologies

Git, Docker, Kafka, Redis, PyArrow, Spark, Postman

EDUCATION

Vidyavardhaka College of Engineering

Computer Science(AI&ML) and Engineering

9.20 CGPA

2023 – 2027 | Mysuru

Relevant courses

OOPS, Database Management System, Data structures and algorithms, Operating System, Computer Networks, Machine Learning, Deep Learning.

EXPERIENCE

Hewlett Packard Enterprise(HPE), Project Intern

02/2026 – 07/2026

- Developed the Telemetry Ingestion Microservice for ATLAS, a distributed telemetry platform processing data from 80,000+ servers.
- Collaborated in an Agile team of 5 to integrate Kafka, Spark, Delta Lake, and ClickHouse into the telemetry ingestion pipeline, enabling scalable real-time analytics.
- Optimized Ingestion APIs and TimescaleDB workflows, reducing background job latency by 40% and improving telemetry processing throughput.

ACHIEVEMENTS AND CERTIFICATION

Winners - INNOWAH! Innovation Challenge by PALS, IIT Madras

03/2025

Developed an AI-powered personalized learning platform and won in the Economic Growth category among 500+ teams.

AWS Certified Cloud Practitioner (CLF-02) - Amazon Web Service

08/2026

PROJECTS

Advanced Sign Language Detector

- Developed a real-time sign language recognition system using MediaPipe, OpenCV, and Random Forest, supporting personalized user-defined and predefined gestures.
- Built an end-to-end ML pipeline for custom gesture creation, feature extraction, training, and real-time prediction.
- Engineered an 84-feature dual-hand representation and integrated browser-based Text-to-Speech for live translation.

Tech Stack: Python, Flask, OpenCV, MediaPipe, Scikit-learn, HTML, CSS, JavaScript.

Equiskill-AI

- Developed an AI-powered course generation module using Gemini API with multilingual, class-wise, and 3 difficulty level-based customization.
- Implemented personalized course generation and integrated AI-generated notes and quizzes.
- Collaborated on authentication and platform integration using Clerk and NeonDB.

Tech Stack: Next.js, Node.js, Gemini API, Clerk, NeonDB, Vercel, CSS

INVOLVEMENT

Elevate-U club, VVCE, Core Member

Organized and coordinated club activities to foster communication, teamwork, and leadership skills among students.

Peer Tutor

Mentored fellow students in core computer science subjects, enhancing their understanding while strengthening my problem-solving and technical communication skills.
